

WE THINK SAFETY ALL THE TIME BECAUSE WE CARE ABOUT YOU

Safety is ultimately the responsibility of each employee. At The Systems Group, we believe that information and education is key to understanding and combating the threats associated with workplace hazards. It is our goal to have a totally safe workplace.

-  Constantly be aware of working conditions that can produce injuries and illnesses, and take effective corrective actions immediately.
-  Report ALL injuries to your supervisor, no matter how minor you may think the injury is.
-  No job should be performed in a way to jeopardize or compromise the safety and health of any employee.
-  It's Safety, Quality and Quantity.....
In that order.
-  Everyone is responsible for their own safety and the safety of others.
-  Lead by example: be a leader in your safety habits.

WE THINK SAFETY

•Employee Involvement •Job Hazard Analysis •Safety Training •Safety Management •Proactive Safety Approach
•Decades of Combined Knowledge and Capabilities
